Thanks Joan. I don't think scheduling with Stan has commenced. Will ask Betsy to work on it. Are you putting together talking points for Shaun?

That looks ok to me. The other offices know that Shaun wants to consult with Stan before we move forward. Has scheduling with Stan commenced? Also, public meeting is on Feb 17.

Hi Joan,

Any concerns/comments? Shaun did not want me to mention Friday meeting. On Pavillion should I be more specific on what office in HQ we will reach out to?

**Weekend Report from R8**

***Call With Senator Tester's Staff*** – At the request of Senator Tester's staff we had a call with 5 staff from the Senator's office to discuss the Columbia Falls Alluminum Company (CFAC) proposed Superfund listing. We had a good conversation about the process for Superfund listing, the Superfund Alternative Approach and the importance of strong community engagement. Tester's staff said they were not so concerned with where we land on listing versus the Superfund Alternative but rather the need for exceptionally strong and consistent communication

with the community from EPA and the Senator's office. We let them know we were planning our next community outreach event in Columbia Falls within the next two months and would coordinate with them. They offered to help facilitate conversations and identify key community leaders. They said Senator Tester would be following up with the Administrator on the importance of communication in the community.

***Pavillion, WY*** - Due to inclement weather the 2/2/16 Pavillion Working Group Public Meeting is being rescheduled for mid-February. The purpose of the meeting is to provide an opportunity for the public to ask questions and comment on the draft Pavillion report released by the State. We had previously decided not to attend the public meeting and cleared a desk statement in that regard with OPA. With the postponement of the meeting we will be reaching out to HQ to reconsider whether to attend the meeting. We are currently reviewing the State's draft report and have a schedule in place to ensure a full vetting with ORD/OW/OA prior to finalization of our comments. The comment period closes March 18<sup>th</sup>.
